

Background

Pershing is looking for a talented and hardworking design engineer to join our team to work on a wide variety of AV/IT projects for government, corporate, medical, higher education, and financial customers around the world. We need someone who is highly motivated, interested in the latest technology and innovation, has excellent writing and communication skills, and an exceptional commitment to detail. We are a virtual company, so no matter where you are, you can find a home at Pershing.

Responsibilities

Systems Engineers at Pershing are responsible for turning client ideas and requirements into realities. A few of those responsibilities include the following:

- Participate in requirements gathering and consulting efforts
- Participate in design charrettes
- Develop consulting briefs and programmatic documents
- Develop bid packages, including full drawings and specifications
- Collaborate with internal and external teams, including other engineers, designers, programmers, architects, and manufacturers
- Configure and commission technology systems
- Manage multiple projects and a dynamic flow of tasks and responsibilities

Qualifications and Experience

Required

- 1-3 years experience in AV/IT (or closely related field)
- Bachelor's Degree
- G Suite and Microsoft Office
- AutoCAD
- Independently motivated and ability to work under deadline

Bonus Points

- 3-5+ years experience in AV/IT (or closely related field)
- Master's Degree
- Revit
- CTS, CTS-D, or CTS-I
- Programming, audio systems commissioning, network configuration experience
