

Background

Pershing is looking for a talented and hardworking senior level audiovisual design engineer and consultant to join our team! We work on a wide variety of AV/IT projects for government, corporate, medical, higher education, and financial customers around the world. Our projects include the design of conference and collaboration spaces, video and audio production environments, command and control centers, studios, restaurants and entertainment venues, and probably some unusual spaces and systems neither you nor we have thought up yet.

We are looking for someone to manage and oversee quality assurance and quality control (QAQC) tasks, as well as lead training and development for both new employees and tenured staff. The ideal candidate should have extensive experience with audiovisual and technology design projects, including the development of design package documents such as drawings, specifications, narratives, and other artifacts. The right person will have a passion for high quality, detailed design documentation and be inspired to introduce and educate new talent.

Location

Pershing is a fully virtual company with no physical office location. This position is a work-from-home position, however we are looking for someone in the northeast, located between Washington D.C. and New York.

Responsibilities

As the lead QAQC Engineer and training manager, your responsibilities will include:

- Managing and overseeing QAQC efforts for all design and engineering efforts
- Reviewing design documentation prior to client submissions
- Developing training materials and curriculum for new employees
- Developing training and professional development strategies for tenured staff
- Working with design engineers and consultants on regularly auditing and improving processes and documentation
- Researching industry trends and technologies

Qualifications and Experience

Required

- 7 years minimum experience in AV design and documentation
- Bachelor's Degree (in anything really - we have quite the assortment here)
- CTS-D
- Experience with and proficient in AutoCAD, Revit, and Bluebeam or similar
- Independently motivated and able to work under deadline
- Excellent verbal and written communication skills
- Strong attention to detail

Bonus Points

- Master's Degree or higher
- CCT, CCNA, CCNP, or CCDE
- Experience configuring and commissioning AV and IT systems
- Teaching experience

Benefits

Pershing offers a competitive assortment of benefits, including fully covered healthcare, dental, and vision insurance, life insurance, 401(k), home office setup stipend, and more.
